Aldrin Ajoc Maquiling

Fullstack Web Developer

Surigao del Sur, Philippines | +639761203540 | maquiling.aa@gmail.com | aldrinmaq.github.io

SUMMARY

Fullstack developer with 3+ years building Java/Spring Boot backends and Vue.js/TypeScript frontends. Focused on reliable REST APIs, reusable UI, and automated testing that cut manual QA effort.

SKILLS

Backend and Databases: Java, Spring Boot, Node.js, PostgreSQL, MySQL
Frontend: Vue.js, TypeScript, JavaScript, Tailwind CSS, PrimeVue, PrimeFlex, HTML, CSS, Figma
DevOps & Tools: Nginx, Fail2ban, Docker, Git, CI/CD, Selenium
AI-assisted workflow: Claude, Cursor, Gemini, ChatGpt, OpenCode

WORK EXPERIENCE

Fullstack Developer, mykuan.app - **Remote** June 2023 – Present

- Built 30+ REST APIs and CRUD flows in Java and Spring Boot for scalable backend services and client-server interaction.
- Built a Node.js middleware PoC to test advanced data sync approaches and guide later architecture choices.
- Built 15+ reusable Vue.js components and UI mock-ups for dynamic frontend needs.
- Wrote 20+ Selenium tests, raising coverage and cutting manual testing by 30%.
- Worked with cross-functional teams in Agile/Scrum on sprint planning, delivery, and ongoing improvements.

PROJECTS

Growgreen (Thesis) | Lead Developer

- Spearheaded the full-stack development of an interactive environmental sustainability platform, managing the end-to-end project lifecycle.
- Architected a scalable backend using Java and Spring Boot to power a gamified system that connects virtual engagement with real-world conservation tracking.
- Engineered a responsive Progressive Web App (PWA) utilizing Vue.js and TypeScript, delivering a seamless, cross-device user experience.
- Integrated Google OAuth2 for secure user authentication and streamlined session management.

Weathercheck | Personal Project

- Developed a real-time weather tracking Progressive Web App (PWA) utilizing Vue.js and Tailwind CSS, delivering a highly responsive layout.
- Integrated the Windy API to fetch and display dynamic atmospheric data, engineering custom UI components for direct access to rain, wind, and storm metrics.
- Optimized application discoverability by implementing fundamental SEO strategies through precise meta-tag configuration.

GoFindPro | Personal Project

- Developed a responsive, map-based platform using Vue.js, TypeScript, Tailwind CSS, and Leaflet to help users discover and connect with local skilled workers.
- Implemented interactive maps, location-based discovery, keyword search, and category filtering to simplify finding nearby service providers.
- Built provider profiles with direct contact options, shareable links, and review submission features to improve accessibility and user engagement.

EDUCATION

Bachelor of Science in Computer Science - Graduated **2022 – 2025**
North Eastern Mindanao State University - Rosario, Tandag, Surigao del Sur

Bachelor of Science in Information Technology — Coursework through 3rd year (incomplete) **2018 – 2021**
Jose Rizal University - 80 Shaw Blvd, Mandaluyong, 1552 Metro Manila
